Cook Co./Foseco, Inc.
ILD051067866

Foseco manufactures metalurgical products for treating molten metals, molds and dies. They have submitted a 103(c) Notification with no waste type noted. (Ref.1). Cliff Gould, of the I.E.P.A., spoke with Mr. R. Rae, Environmental Coordinator, of Foseco's Corporate office in June, 1984. Mr. Rae stated that he had filed the Hazardous Waste Site Notification to be safe. By leaving the waste characteristics sections blank, he represented that no hazardous waste is generated by plant operations and that none has been disposed of at the facility. Foseco does have a Special Waste Generators Non-hazardous Permit for insulating refractory by-products but no hazardous waste is known to be disposed at this facility.

Based on the lack of documentation on hazardous waste type, quantity, toxicity or persistence, this site will yield a HRS site migration score of zero.
